

EXTRA EXTRA READ ALL ABOUT IT...CLS PROMOTES CD

We would like to thank *Security Dealer Magazine* for featuring us in their March and July issues. *Security Dealer Magazine* serves the security industry, dealers, manufacturers, engineers, architects and related field personnel. They featured CLS as part of their *Business Assistance, Training, and Incentives* article.

Our CD has a series of power point presentations along with photos of different installations. This helps our customers see first hand how our system works and where it can be used. Our current catalog can also be found on the CD. If you would like a copy of our CLS CD please e-mail Rory Utter at rory@nslights.com.

Come see Don Pike at the 2006 ASIS show in San Diego, CA

He will be exhibiting at booth number 4556 on September 25th through the 27th. For show passes please email Rory at rory@nslights.com.

NEW CD AVAILABLE

Camera Lowering Systems, division of North Star Lighting Group, is offering a CD of its lowering systems for cameras, monitoring devices, and parabolic listening devices. The CD provides an extensive presentation of various installations. It comes with step by step procedures for such installations.

The lowering system allows the devices to be mounted at heights up to 150ft and lowered to the ground for ease of maintenance. This system

eliminates the need for expensive lowering equipment and specialized personnel, while still being safe.

For more information, visit www.cameralowering.com.
